Welcome to the Illuminated Path

A simple awareness is all it takes to shift your conscience to a higher level. Conscious awareness is where the journey begins, and it is our mission to help you find the illuminated path that God has laid out for you simply by making you aware of the spirit world around you. "Most earthbound souls aren't aware of the unlimited resources available to them by simply asking. It is our greatest pleasure to assist you with all your needs. We are kind, loving beings sent from God to aid in your life on earth. We are here for one main reason and that is to assist you, by giving messages from the Almighty Creator. He loves you more than you can possibly imagine and we are his gift to you. Utilize us to make your lives better, more fulfilled, more compassionate. We are delighted to help in any way that we can. However, we cannot interfere without being asked to do so. God has given you free will, enabling you the choice to choose which path you will follow. It is His wish that you choose Him. If you do not, He will wait until you do". This message was given to me by my guardian angel, Horatio. He is a very strong presence in my life and in fact, has encouraged me to share his messages as "they will inspire and uplift your brothers and sisters".

It is my mission to provide intuitive consultation by channeling messages from spirit, whether it be your guardian angels, spirit guides or deceased loved ones, the goal is to promote healing and growth for your soul, It is not casual conversation, it is to help empower you, help you recognize that you are NOT the physical body. You are a divine being and have the ability to transcend fear and doubt in order to live your highest purpose. "One must be aware of The Source living within, one has to acknowledge this is order to tap into the power within. It is part of the 'awakening' process that every soul must go through on the earth plane – To discover their true essence or the true nature of who they are" (words of wisdom from Horatio, my guardian angel). He says God is inside each and every one of us and so is his power. "One must recognize that Source and the infinite possibilities available to them- in order to live a life fulfilled".
